

ICT-info for students

2018

Satakunnan ammattikorkeakoulu
Satakunta University of Applied Sciences

BYOD/general info

BYOD is a operating model that is rapidly expanding both in companies and in educational institutions. The BYOD includes WLAN, printing, security, applications, IT classes, virtualization, network connectivity, user management, power supply, information, support, training, etc.

For students, BYOD means that study-related work is mainly done with your own computer. SAMK students are required to do so from the beginning of the autumn term from 2017 onwards.

All relevant BYOD information can be found on the SAMK website:

<http://www.samk.fi/en/study/admissions/bringing-your-own-device/>

BYOD-clinic

The BYOD clinic is SAMK's own customer service, where students advise students on issues related to the BYOD approach. BYOD clinic will be open 6 weeks at the beginning of each academic year.

The BYOD clinic has a desk at the Pori and Rauma campuses and for all students we offer service portal on web (see ServiceDesk)

Not all service desk staff were pleased about the new *bring you own device* policy.

BYOD/network

The whole campus is a learning environment, so the wireless network will work well in all areas.

Access to WLANs for students:

- 1) Get a WLAN connection called "SAMK Info".
- 2) You will automatically be able to access the page with the SAMK-STUDENT network dedicated to the actual SAMPLE.
- 3) If you still have problems connecting with the BYOD, the BYOD clinic will help.

Outside the campus you need at least 3G, but preferably Wi-Fi or 4G.

More information on SAMK's BYOD site.

BYOD/device recommendations

Studying in accordance with these recommendations is expected to be possible in all degree programs. For the most part (eg welfare or business), a lighter solution is enough.

- Windows 10 operating system
- At least 8 GB of RAM, (Tech students 16 GB)
- Recommended 3-4 year warranty (eg Warranty Extension)
- A minimum of FullHD level display
- SSD, 120G or greater
- A good battery that lasts for several hours
- Integrated camera

BYOD/software

Some of the software used in studying can be download to your own computer.

Download instructions can be found on SAMK's BYOD site. In many cases the download address will be given by the course teacher.

Those software that can not be installed on your own devices are installed in SAMK's IT-classrooms, whic are equipped with powerful workstations (CAD etc.).

BYOD/printing

Instructions for BYOD printing can be found on SAMK's BYOD pages.

We use so-called Follow me print in the BYOD environment

This means you can print from anywhere and get your printouts from the printer you choose.

SAMK has for a long time reduced the amount of printing and only the necessary material is printed on paper.

Nature says: Thank You, SAMK

5 Paper Tips: Think Before You Print

1. Use both sides of the paper
2. Go digital – read, send and store digital documents
3. Be selective about what you print
4. Reach for the right paper
5. Recycle

BYOD/security

Student discount

F-Secure offers students security products at a discount.

More information on SAMK's BYOD site

BYOD/Office 365

You have free Microsoft Office software that you can either install on your own computer, or use the web applications on the server - or both.

In addition, you have a free OneDrive for Business storage space for your files - you can share files with other students or teachers.

Log in with your browser, you'll get the ID at the beginning of your studies. The username is in the form:
firstname.lastname@student.samk.fi, and your password is your SAMK password.

<https://mads.samk.fi/adfs/ls/?wa=wsignin1.0&wtrealm=urn:federation:MicrosoftOnline>

Office 365

IT-classrooms

SAMK has 4 IT classrooms on the Pori campus and 3 IT classrooms on the Rauma campus.

These classrooms include SAMK computers that have software installed like CAD, Adobe, simulations, technical planning etc...

The use of IT classrooms is the most common in the field of technology and less in the welfare and business.

ServiceDesk

ServiceDesk is SAMK's online service portal. The portal is in English but you can also write in Finnish.

Sign in to ServiceDesk with your own SAMK username and password.
